

# ***Sex work & money***

We are 2 different classes of sex workers.

Some sex workers do (or can) NOT invest.

They can only save under the mattress (bank lock-box). This however yields NO *compound interest*, which is equal to doubling of capital in some years time (rule of 72). They (can) only pay the current bills or pay for consumption (luxury, party, drug self medication, numb feelings). This is an un-healthy finance trap, typical poor uninformed worker's trap and leads into the so called "prostitution trap". It essentially is "survival sex" and can lead into deep poverty and give abolitionists arguments.

Break this vicious circle! Learn how to self-manage, save and have a future.

## ***Learn to invest!***

- Requires to legalize your profession. Legalisation workshops
- Requires to come-out to your close supporters (partner, family, friends). Coming-out groups
- Requires to come-out and register with the tax office (earn white money). Whore college

Clever or privileged sex workers invest in:

- college education or regular trainings (future market value as non-sex worker)
- pay for raising children (most archaic form of insurance/pension)
- buy own home (spare paying rent in the future)
- learn to use the capital market (life annuity calculator [www.bit.ly/LnUbWZ](http://www.bit.ly/LnUbWZ))
- set up our own sex work business as company (invest in: studio, brothel, agency)
- organise setting up your after-sex-work or non-sex work side business (independence)
- have massive passive income in the future (e.g. from patent rights of your porn or rental)

## ***There is life after sex work!***

Sex work often unconsciously is regarded as personal bail-out program or protest lifestyle of last resort! Then we learn it can be fun, rewarding, easy, fast and performed nearly everywhere and everytime during youth or the first years. That is why most cute, motivated, new sex workers are like millionaires and do not (need to) think about money and future but rather do activism or fun. But later and suddenly sex work may become impossible (accident, crime, raid, illness, SWBO, age degressive income curve...) and then a sex workers is trapped (hedonism becomes fatalism).

Think about the two-world divide of sex workers living in a barter-only economy without investment (time value of money) and where your abyss or invisible glass ceiling may hide...and where to get knowledge and support...
